

# Backend Instructions

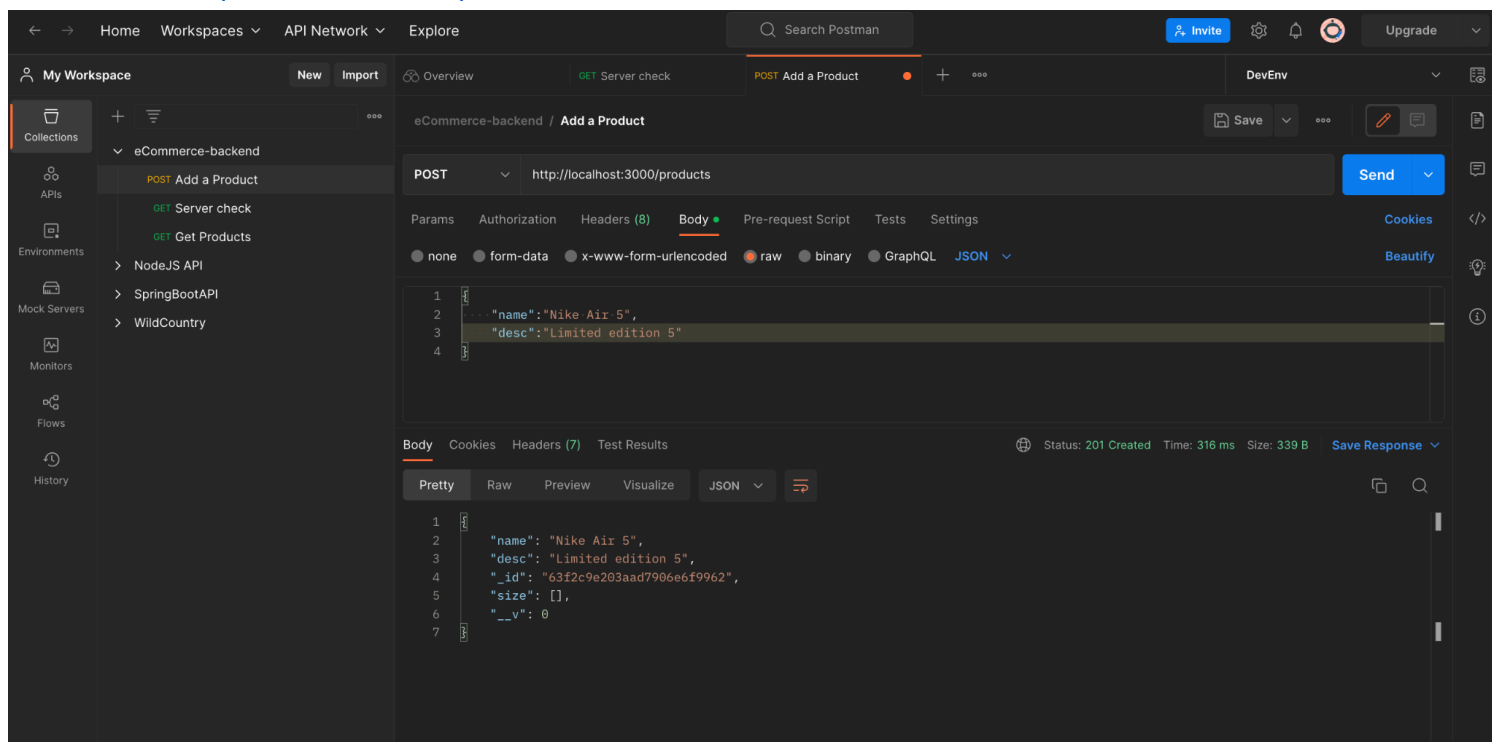

To run this server locally:

- Clone the project from eCommerce repo using 'git clone https://github.com/mitrjain/eCommerce'
- Once inside the backend directory, run 'npm ci', then 'npm run start'
- You should see the website being displayed in 'http://localhost:3000/'

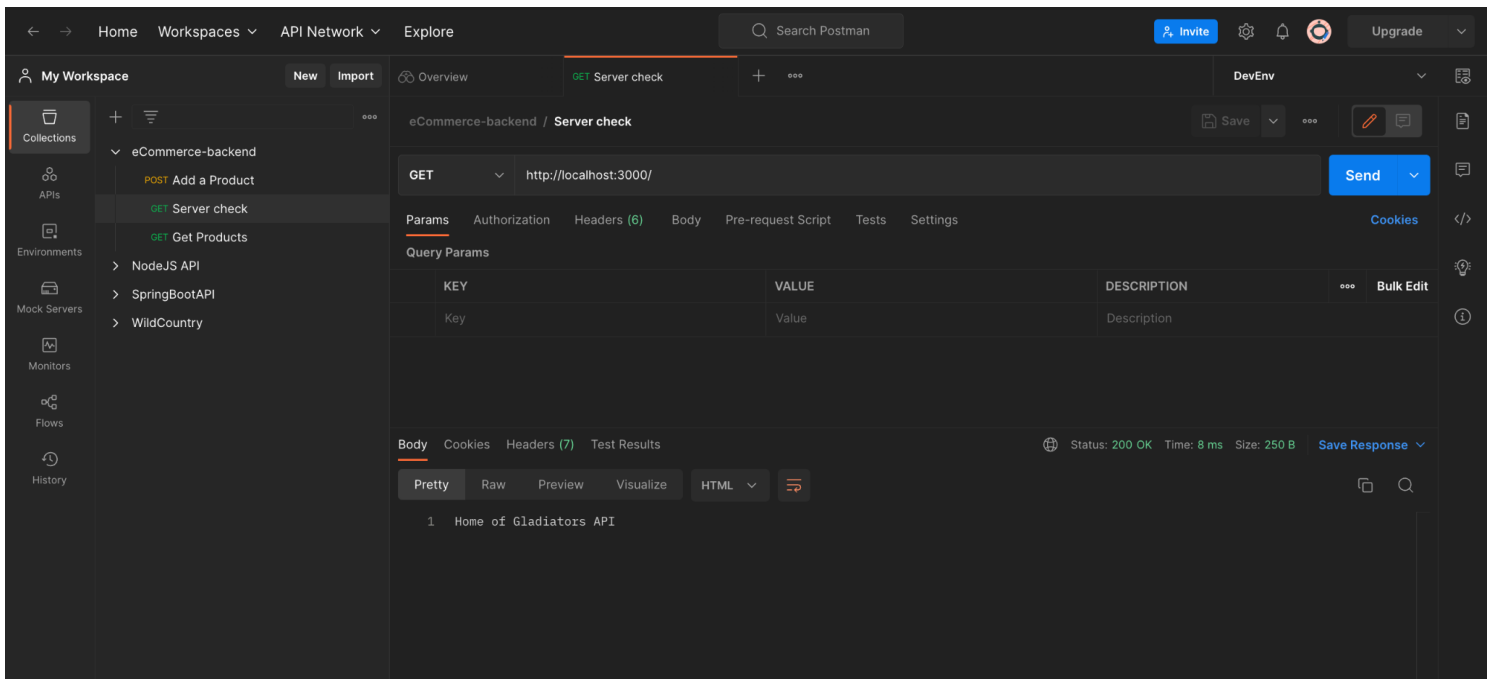

To Test the server:

The server can be tested by sending requests to the following API endpoints using Postman:

- POST <http://localhost:3000/products>

- GET <http://localhost:3000/>

- MongoDB Atlas
  - Viewing access provided to [toshi.bhat@sjsu.edu](mailto:toshi.bhat@sjsu.edu), [chung-wen.tsao@sjsu.edu](mailto:chung-wen.tsao@sjsu.edu)
