

Problems to be fixed

Problem	Reason
(Backend) Hosting website on AWS	Due to some AWS issues, hosted website keeps going down. Llive demo was presented in class and at that time hosting was working.
(Backend) Results of material filters	The material filter might be giving inaccurate product listing and this could be an API issue.
(Frontend) Seller page bugs <ul style="list-style-type: none">• Validation of input data on seller page.• Quantity add button	Time constraints
(Frontend) Product Listing page <ul style="list-style-type: none">• Restrict selection to only one filter at a time.	Time constraints
